

Greetings

from the ESRD Network!

The End Stage Renal Disease (ESRD) Network was established by the Centers for Medicaid & Medicare Services (CMS) to help educate dialysis patients and providers to improve dialysis quality. We are committed to providing patients with the best assistance and learning resources possible.

Check out our resources (created by patients for patients) and the services we offer using your smart phone or other device by scanning this QR code or visiting our website at

www.hsag.com/esrd-networks-patients.

The resources you find on our website were made with input from patients just like you! Please share the resources with other patients you know.

We need your feedback.

Please use your smart phone or other device to scan this QR code to complete a very short survey. Thank you for your input.

Your feedback will help ensure we are meeting the needs of patients throughout our coverage area. Thank you so much for your time.

Sincerely,
The ESRD Network Team
