

# Increasing Vaccination Rates Quality Improvement Activity (QIA)

## Best Demonstrated Practices

These best practices were submitted by facilities that demonstrated rapid cycle improvement.

Assign a vaccination manager

Include a vaccination consent/declination form in the new patient packet

Develop/Use a vaccination tracking tool/binder

Post immunization educational materials in the lobby

Follow up on vaccinations received outside of the clinic and document

Ask physicians to speak with their patients to encourage vaccination

Give each nurse a small number of vaccinations to administer each shift, each day

Document all vaccinations and ensure vaccination status is entered in EQRS/CROWNWeb

Have more than one EQRS/CROWNWeb user in each facility

Have a vaccination day—include education, consents, and vaccinations

Have staff and administrators receive their vaccinations in front of patients
