

Ensuring Medication for Opioid Use Disorder (MOUD) Treatment through the Care Continuum Webinar Series

Management of Patients on MOUD: Key Takeaways and Series Wrap Up

Friday, June 7, 2024

In partnership with all Quality Innovation Network-Quality Improvement Organizations

QIN-QIO Partnership to Address the Opioid Epidemic

This series is a collaboration of all Quality Innovation Networks–Quality Improvement Organizations (QIN-QIOs). National experts across the healthcare continuum provide robust educational content to address the opioid epidemic.

Learning Objectives

- Share lived experiences in navigating the care continuum.
- Discuss strategies and/or programs that people in recovery benefit from the most.
- Explore solutions that could support people in recovery.

Guest Speakers

Terri Green-Wright, BA, CPRS

Certified Peer Recovery Specialist & Tennessee Recovery Navigator
Recovery Services Care Coordinator

Johnnie Peeples, BS, MBA

CATC-II Certified Addictions Treatment Counselor
Mental Health Counselor

What Is Your Story?

Guest Panelist

Lindsay Sarver
Community Health Improvement Strategist

Some Takeaways From Our Previous Sessions

- Buprenorphine: treatment and safety considerations
- Dispense 3-day supply on discharge (at minimum)
- Benefit of long-acting injectable buprenorphine
- All primary care providers should be prescribing medication assisted treatment (MAT) for their treatment with OUD
- Treatment modalities taking into account biopsychosocial conditions

Could you tell us more about the bio-medical conditions that patient/people in recovery are experiencing?

What are the most effective strategies
and/or programs that people in recovery
benefit from the most?

Could you tell us more about the importance of maintaining MOUD during the transition of care (warm hand-off)?

What solutions could better support people in recovery?

Stigma

ODD is a medical condition, not a moral failure.

We want to hear from you!

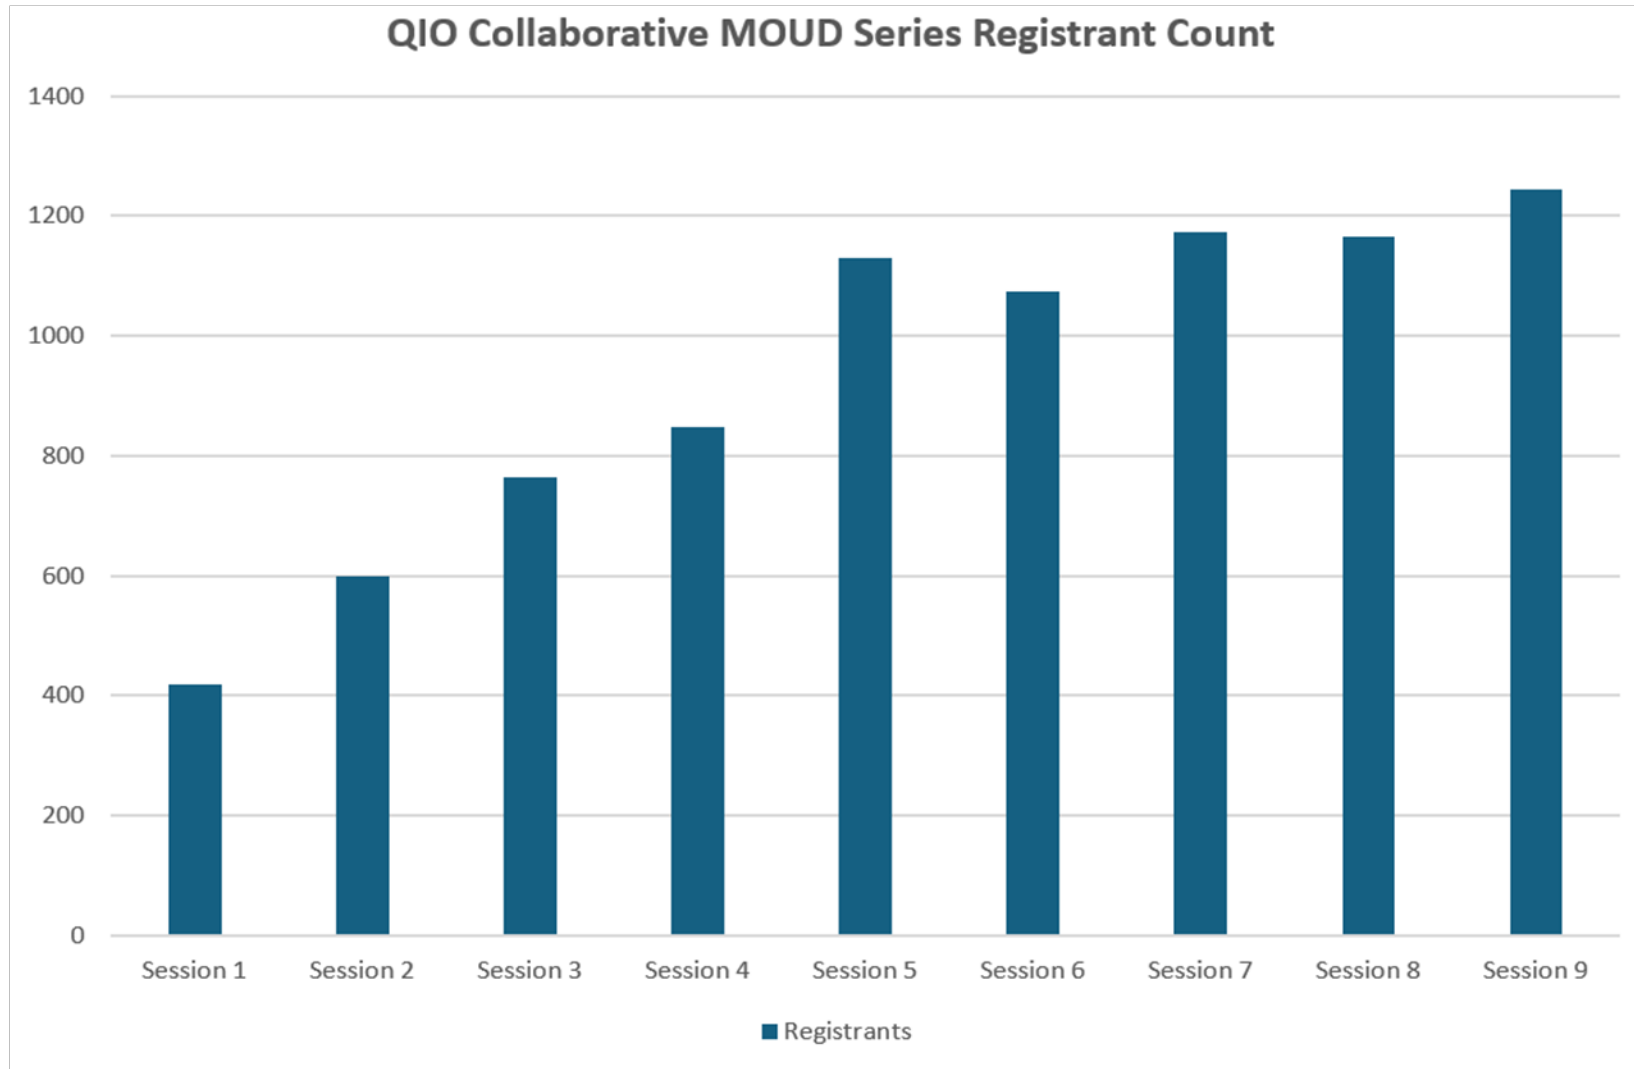

Our common goal:

Improving the management of patients with OUD through the care continuum.

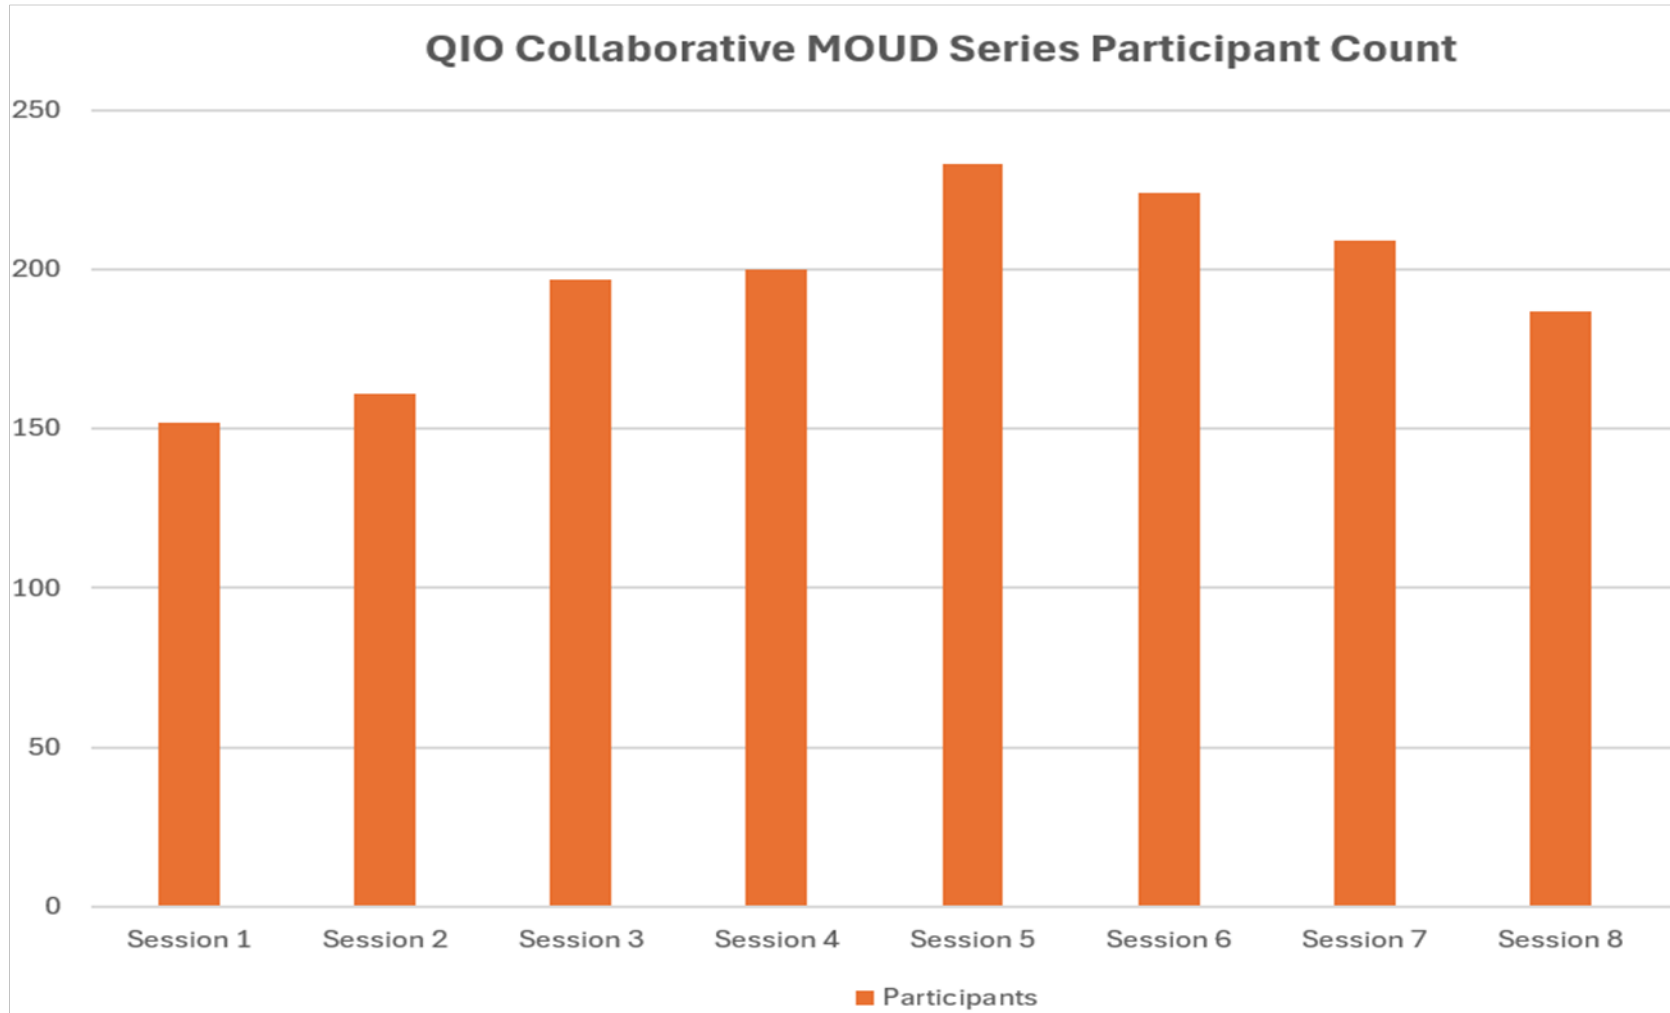

- What have you learned through this series?
- What actions have you taken since September 2023?
- What would you like to hear about during a potential future series of webinars?

QIO Collaborative Opioid Series

Ensuring Medication for Opioid Use Disorder (MOUD) Treatment through the Care Continuum Webinar Series

More than 1 million Medicare beneficiaries had a diagnosis of opioid use disorder (OUD) in 2020.¹

However, fewer than 1 in 5 Medicare beneficiaries with an opioid use disorder diagnosis received medication to treat this condition. In addition, the number of patients who stay in treatment after hospital discharge decrease drastically during the transition of care.²

This webinar series is a collaboration of all of the Quality Improvement Organizations and will provide strategies, interventions, and targeted solutions to ensure access to MOUD treatment and facilitate the continuity of care through the continuum.

Please join us to hear from national experts during this monthly webinar series occurring on Friday of the month from September 2023 through June 2024 at 12 noon ET, 11 a.m. CT, 10 a.m. MT, 9 a.m. PT.

Register for this no-cost series at: bit.ly/MOUDthroughCareContinuumSeries

A general certificate of attendance will be provided for continuing education/contact hours. Attendees are responsible for determining if this program meets the criteria for licensure or recertification for their discipline.

- Session 1: Role of the Emergency Department (ED) Physician in the Treatment of Patients with OUD
- Session 2: Role of the Pharmacist in the Treatment of Patients with OUD
- Session 3: Seamlessly Transitioning Patients on MOUD to Nursing Homes | Formal Presentation
- Session 4: Seamlessly Transitioning Patients on MOUD to Nursing Homes | Panel Discussion

- Session 9: Management of Patients on MOUD: Key Takeaways and Series Wrap Up
