ASPR's Technical Resources, Assistance Center, and Information Exchange

Developed as a healthcare emergency preparedness information gateway to address the need for:

- Enhanced and rapid technical assistance (TA)
- A comprehensive, one-stop, national knowledge center for healthcare system preparedness
- Multiple ways to efficiently share and receive information between various entities, including peer-to-peer
- A way to leverage and better integrate support (force multiplier)
- Ways to prepare deployed and field staff via resources developed with our cadre of subject matter experts

Topic Collection: Long-term Care Facilities

Technical Resources / Location-Specific Collections / Long-term Care Facilities

Long-term care includes a range of support services that an individual may need to meet their personal care needs. Long-term care may be provided through home healthcare services, or in facilities, such as nursing homes, assisted living facilities, and continuing care retirement communities. Individuals needing long-term care may include the elderly, those with chronic health conditions, and individuals requiring short-term rehabilitation.

This Topic Collection addresses residential care facility issues including skilled nursing facilities and assisted living facilities. The Homecare and Hospice Topic Collection contains information for primarily non-residential services. Long-term care facilities pose unique challenges during disasters due to the vulnerability and fragility of their residents. Recent disasters have illustrated the risks to long-term care residents during facility evacuation. The promulgation of the recent CMS Emergency Preparedness Rule was designed in part to increase the mitigation and preparedness activities of long term care facilities to reduce these risks.

Each resource in this Topic Collection is placed into one or more of the following categories (click on the category name to be taken directly to that set of resources). Resources marked with an asterisk (*) appear in more than one category.

Four Provisions for All Provider Types

Areas of Focus

- Patient Population not assessed in the facility's risk assessment;
- Tailoring risk assessments to the facility;
- Leadership knowledge of the emergency plan;
- Testing Exercises & After-Action Reviews (AARs);
- Integration with other plans and programs.

ASPR TRACIE & CMS

- Collaboration since inception of ASPR TRACIE and original 2016 Emergency Preparedness Rule.
- ASPR TRACIE's by-provider checklists:
 - Self-Assessment Tool
 - Identifying location of document
- Some surveyors also use the checklists assessment of a facility's compliance.

ASPR TRACIE & CMS

- CMS has the QSOG_EmergencyPrep@cms.hhs.gov resource mailbox, while ASPR TRACIE has one as well askasprtracie@hhs.gov.
- Our teams collaborate on TA requests. Policy and compliance inquiries are the responsibility of CMS, while requests for tools, resources and assistance on emergency preparedness are managed through ASPR TRACIE.

Resources

- Providers and suppliers should refer to the resources on the CMS website for assistance in developing EPPs. <https://www.cms.gov/Medicare/Provider-Enrollment-and-Certification/SurveyCertEmergPrep/index.html>
- The Assistant Secretary for Preparedness and Response (ASPR)- Technical Resource Assistance Center and Information Exchange (TRACIE) <https://asprtracie.hhs.gov/cmsrule>
- Not sure if you are a Medicare-participating facility that needs to comply? Visit https://qcor.cms.gov/index_new.jsp and search your facility's information.

Thank you!

QSOG_EmergencyPrep@cms.hhs.gov

Three Things to Do

- Bookmark the ASPR TRACIE website. Become familiar with the plethora of resources available.
- Remember to reach out to the TA center for your emergency preparedness and response needs.
- Be familiar with Appendix Z and utilize ASPR TRACIE's provider checklist as a survey readiness tool.
