Between 20–50% of antibiotic prescriptions are either unnecessary or inappropriate.

- Check the dose and duration of the antibiotic order?
- Verify that there were no medication changes or updated culture results received after medication labels were printed?
- Report the FINAL culture sensitivity to the doctor?

Fishman N. Am J Med. 2006 Jun; 119 (6 Suppl 1):S53-61

Is this the RIGHT DRUG for the RIGHT BUG?
