

Could Transplant Be Right for You?

In the past, you mentioned that you did not want to have a kidney transplant. We feel it is important to revisit all the care options available to you, including transplant, at least once a year. If you still do not want a transplant, it would be helpful for us to know why so we can ensure you have the support and information you need regarding modality options.

Additionally, the information you provide will be combined with feedback from other patients and sent to your ESRD Network. The Network will keep your responses confidential but will use them to develop new educational materials regarding transplant as a modality option.

Please check the main reason for your current thinking about transplant:

- I do not know enough about transplant to make a decision.
- I went to orientation and it scared or overwhelmed me.
- I do not have the insurance or additional finances to cover the costs for transplant (i.e., medications, transportation).
- I do not believe in transplant due to faith/religious reasons or cultural beliefs.
- Someone I know had a bad experience with a transplant.
- I am too old to have a transplant. (Your age: _____)
- I do not want to have surgery.
- I want to stay with my current treatment option.

Other reason:

If you have changed your mind and would like more information about transplant, please check the box below and a facility staff member will contact you soon.

- I would like to reconsider transplant as a modality option.

The Network appreciates your feedback.

To be completed by facility staff.
